

Catalog of Economic Time Series

Introduction to the Catalog:

The Catalog of Economic Time Series (CETS) is a glossary of standard acronyms for the most commonly used social and economic data maintained in the central databases of the World Bank. The purpose of the Catalog is to provide Bank staff with an inventory of frequently requested data available and to suggest a general naming convention for time series data maintained on the Economist's Workstation.

The acronyms or "CETS codes" documented in the Catalog provide a general framework for organizing and describing economic data. For databases kept on personal computers, and particularly those maintained as part of the Economist's Workstation, CETS codes have become the standard nomenclature employed at the Bank. They are the common language of the EWS, linking databases to analytical models and reports.

The CETS codes complement the longer, descriptive acronyms used.

The Catalog is not a complete "data dictionary." It does not provide definitions or accounting rules. Users who wish to know more about the sources, definitions, and accounting identities underlying particular databases should consult User's Guide. More information about the statistical conventions employed at the World Bank, contact Development Economics Data Group (DECDG).

The Structure of CETS Codes:

A systematic naming convention is an important part of database design. Variable names should be both convenient to use and easy to remember. Names that are long and descriptive are slow to enter and result in formulas that are difficult to read. Names that are too short or names constructed by arbitrary sequencing schemes are difficult to remember. To some extent the ideal naming convention depends upon the structure of your database and the purpose of your application. Although small database or a simple model can use a correspondingly simple naming convention, many applications outgrow their original purpose and, hence, their nomenclature, forcing the model builder to rename and redocument the application. Therefore it is often best to think big from the beginning.

The Catalog does not contain all of the time series stored in the Bank's Central Database, nor can it provide specific rules for constructing mnemonics for all the data a country economist is likely to collect. Users are encouraged to generate their own mnemonics as needed, following the general model.

The generic structure of the Extended Indicator Code is as follows:

	General	Specific	Extensions
Topic	Subject	Subject	1 2 3
(2 digits)	(3 digits)	(4 digits)	(2 digits each)

For example,

NE	CON	PRVT	KN 80
BX	TRF	PRVT	CD

would read "National Accounts expenditures on private consumption in constant 1980 national currency", and "Balance of Payments receipts of private transfers in current US dollars" respectively.

The Topic code identifies a broad grouping based on functional similarities. All Balance of Payments items begin with a B. Two-digit topic codes permit a finer breakdown of data at the highest level. For example, BX identifies Balance of Payments Current Account Receipts while BM identifies BOP current account payments.

The General Subject code specifies a broad subject area within a particular topic. Examples of general subjects are consumption (CON) or gross domestic investment (GDI) in the national accounts expenditure accounts or transfers (TRF) within the balance of payments.

The Specific Subject code further identifies a particular indicator within a database. For example, private (PRVT) consumption and government (GOVT) consumption are two specific subjects under the general subject consumption. Being four digits in length, they will never be mistaken for any other index component, even when indices are permuted as they might be when retrieving data from a Javelin or CD-ROM database.

The three extension fields are available for further clarification of definition, as required. For data recorded in value terms, the first extension could be used for denomination: local, US dollar, SDR etc., in nominal or constant prices; the second would be used to denote the base year for constant price series. In the case of data in non monetary units, the first extension would be units and the second a modifier of the first or a scale factor if needed. The third is left open to the user. One purpose might be to record the data source, such as the Bank (WB), the Fund (MF), or the UN. Another might be to indicate different "vintages" or to distinguish actual values from projections or transformations of series. Users should avoid using extension codes that are identical to the two-digit topic codes.

In some cases it may be preferable to use three or four-digit extension codes. For

example the extension ZS is frequently used to denote a variable calculated as a share of a total; if necessary the extension ZSG could be used to distinguish a share of GDP from a share of total exports (ZSX). Again, the purpose of CETS is to provide a general model not to establish fixed rules for naming variables.

Organization of the Catalog:

The listings in the catalog are arranged by major database sources. Within each database grouping, the series are grouped by specific topics codes and within these groupings they are listed alphabetically.

In each section the definitions are provided for the topic codes. In some cases definitions are also provided for the general subject and extension codes. In the External Debt section, definitions are also provided for specific subject codes.

Changes from Previous Editions:

There have been no major revisions in the Catalog since the November, 1991 edition. There are several deletions and revised codes, which have been denoted by an asterisk (*). Otherwise, all previous codes have been maintained.

The topic codes associated with the production accounts in the National Accounts have been modified slightly. Value-added is now denoted by the generic topic code NV and this code has been incorporated into various EWS applications. Data will be coded either NP (value-added at producers prices) or NB (value added at basic prices), depending on the country. Users may choose to use the more specific designation or use the generic NV since most countries follow one convention or the other.

The social indicator codes in the new catalog have been revised and expanded. These still remain somewhat problematic. Suggestions from users would be much appreciated.

All suggestions for additions or revisions to the Catalog are welcome. Comments, queries, and requests for additional copies should be sent to Development Economics Department, data Group.

Balance of Payments

Topic Codes: Direction of Flows

BX	Exports, receipts, or increase in liabilities
BM	Imports, payments, or decrease in liabilities
BN	Net flows (BX - BM)

General Subject Codes: Account/sub account

GSR	Current account Goods and services
CAB	Current account balances
KAC	Capital account
KLT	Capital account Long term capital
KST	Capital account Short term capital
TRF	Transfers
RES	RES Changes in reserves

External Debt

Topic Codes: borrowers

DB	Central government
DO	Public development banks
DE	Public enterprises and parastatals
DM	Central Bank
DS	State and Local Government
DG	All public borrowers (sum DB,DD,DE,DS,DM)
DF	Private financial institutions
DN	Private non-financial institutions
DP	All private borrowers (sum OF, ON)
DT	All borrowers (sum DG, DP)

Specific Subject Codes: Account/sub-account

Major accounts

AMT	Amortization
COM	Commitments
DIS	Disbursements
DOD	Debt outstanding and disbursed
INT	Interest
UND	Undisbursed debt

Summary statistics (per DRS)

GPA	Average grace period
IRA	Average interest rate
MAT	Average maturity

Calculated lines

NFL	Net disbursements (DIS - AMT)
NTR	Net transfers (DIS - AMT - INT)
TDS	Total debt service (AMT + INT)
DOU	Debt outstanding including undisbursed (DOD + UND)

Subaccounts: Interest

INN	Interest due on new LT debt
INR	Interest on arrears/restructurings/DDSR
ISB	Interest saved through debt-buybacks
ISE	Interest saved through debt-equity swaps
ISO	Interest saved through other debt conversions
ISD	Total interest saved through DDSR (=ISB+ISE+ISO)
IXA	Interest arrears (flow)
IXF	Interest foreign
IXR	Interest rescheduled
IXP	Interest not paid (=IXA+IXF+IXR)

IRA Arrears reductions
INA Adjustments to scheduled interest (=IXP+IRA)

INP Interest paid (cash basis)
INT Interest due (=INP+IXP)

Principal

AMN Principal due on new LT debt
AMR Principal due arrears/restructurings/DDSR

ASB Principal saved through debt buybacks
ASE Principal saved through debt-equity swaps
ASO Principal saved through other debt conversions
ASD Total principal saved through DDSR (= ASB+ASE+ASO)

AXA Principal arrears (flow)
AXF Principal forgiven
AXR Principal rescheduled
AXP Principal not paid (= AXA+AXF+AXR)
ARA Arrears reductions
AMA Adjustments to scheduled amortization (= AXP+ARA)

AMP Principal paid (cash basis)
AMT Amortization due (= AMP+AXP)

Total Debt Service

TRA Reduction in arrears/repayments (= IRA+ARA)
TXP Debt service not paid (= IXP+AXP)

Debt outstanding and disbursed

DPA Existing principal arrears
DIA Interest arrears not yet capitalized
DNA New principal arrears
DON New long-term DOD
DOC Total debt outstanding and disbursed (after adjustments for DDSR)
DOR Consolidations from restructurings/DDSR
DTA Total arrears (interest + principal)
DSF Reduction from debt forgiveness/DDSR

Disbursements

DIR Disbursements for debt reduction
DIN Disbursements on new long-term debt
DIP Total disbursements (including DDSR operations)

Exchange rate/valuation adjustments

DVA Valuation adjustments of debt write-aft
DXR Exchange rate impacts on DOD

Import

(Values in current dollars used as example)

TM	VAL	BEVG CD	Imports of beverages
TM	VAL	CERL CD	Imports of cereal
TM	VAL	CGDS CD	Imports of Consumer goods
TM	VAL	CHEM CD	Imports of Chemicals
TM	VAL	CONS CD	Imports of consumption goods according to BEC
TM	VAL	DURA CD	Imports of Durables
TM	VAL	ENGY CD	Imports of Energy
TM	VAL	EGPT CD	Imports of Equipment
TM	VAL	FATS CD	Imports of fats & oils
TM	VAL	FISH CD	Imports of fish & fish products
TM	VAL	FLWD CD	Imports of fuel wood
TM	VAL	FODS CD	Imports of food according to BEC
TM	VAL.	FOOD CD	Imports of foods
TM	VAL	FOOD CD	Imports of Food
TM	VAL	FUEL CD	Imports of fuel
TM	VAL	FUEL CD	Imports of Fuel
TM	VAL	INTM CD	Imports of Intermediate mfg goods according to BEC
TM	VAL	KGOS CD	Imports of Capital goods
TM	VAL	MACH CD	Imports of machine & transport-equipment
TM	VAL	MANF CD	imports or manufactured goods
TM	VAL	METL CD	Imports of Metals
TM	VAL	METM CD	Imports of metals and minerals including uranium + fuelwood

TM	VAL	MRCH CD	Total of imports
TM	VAL	MTXU CD	Imports of metals & minerals excluding uranium
TM	VAL	NFAG CD	imports of non-food agricultural prod.
TM	VAL	NFCG CD	Imports of Non-food cons goods
TM	VAL	NFPP CD	Imports of non-fuel primary prod.
TM	PRI	NFSV CD	Import of non-factor services
TM	VAL	OAGR CD	Imports of other agricultural product
TM	VAL	OFOD CD	Imports of other foods
TM	VAL	OMAN CD	Imports of other manufactured goods
TM	VAL	OTHR CD	Other Imports
TM	VAL	OTHX CD	Imports of X
TM	VAL	OTHY CD	Imports of Y
TM	VAL	OTHZ CD	Imports of Z
TM	VAL	RAWMCD	Imports of Manufactures
TM	VAL	RAWO CD	Imports of Other raw materials
TM	VAL	RAWP CD	Imports of Primary goods
TM	VAL	RAWT CD	Imports of Raw materials
TM	VAL	RSOL CD	Imports of residual items
TM	VAL	SUGR CD	Imports of sugar & honey
TM	VAL	TIME CD	Imports of timber
TM	VAL	TXTL CD	Imports of textiles according to BEC

Exports

TX	VAL	ALUM CD	Exp. of Aluminum
TX	VAL	BANA CD	Exp. of Banana
TX	VAL	BEVG CD	Exp. of beverages
TX	VAL	BTEA CD	Exp. of Tea
TX	VAL	CELT CD	Exp. of Cobalt
TX	VAL	CERL CD	Exp. of cereal
TX	VAL	CHEM CD	Exp. of Chemicals
TX	VAL	CMD1 CD	Export of Commodity 1
TX	VAL	CMD2 CD	Export of Commodity 2
TX	VAL	CMD3 CD	Export of Commodity 3
TX	VAL	CMD4 CD	Export of Commodity 4
TX	VAL	CNUT CD	Exp. of Coconut
TX	VAL	COCO CD	Exp. of Cocoa
TX	VAL	COFF CD	Exp. of Coffee
TX	VAL	CONS CD	Exp. of consumption goods according to BEC
TX	VAL	COPP CD	Exp. of Copper
TX	VAL	COPR CD	Exp. of Copra
TX	VAL	COTT CD	Exp. of Cotton
TX	VAL	CTRS CD	Exp. of Citrus
TX	VAL	DIAM CD	Exp. of Diamonds
TX	VAL	FATS CD	Exp. of fats & oils
TX	VAL	FERT CD	Exp. of Fertilizer
TX	VAL	FISH CD	Exp. of fish & fish products
TX	VAL	FLWD CD	Exp. of fuel wood
TX	VAL	FOOS CD	Exp. of food according to BEC

TX	VAL	FODX CD	Exp. of Food X
TX	VAL	FODY CD	Exp. of Food Y
TX	VAL	FODZ CD	Exp. of Food Z

TX	VAL	TOGA	CD	Exp. of Tobacco
TX	VAL	TXTL	CD	Exp. of Textiles
TX	VAL	TXTX	CD	Exp. of Textiles X
TX	VAL	TXTY	CD	Exp. of Textiles Y
TX	VAL	TXTZ	CD	Exp. of Textiles Z
TX	VAL	ZINC	CD	Exp. of Zinc
